1. Yönetici Özeti

176	172	0	6
TOPLAM TEST CASE	BAŞARILI (97.7%)	FALSE NEGATİVE (FN)	KNOWN LİMİTS

Genel durum: **PASS** Push izni: ✓ **Onaylı**

Test Sonucu Yorumu

Metrik	Değer	Anlamı	Push Etkisi
False Negative (FN)	0	Hatalı cümle PERFECT almadı	✓ **Push açık**
False Positive (FP)	0	Doğru cümle yanlış fail almadı	✓ **Push açık**
Unsafe Correction	0	Bozuk correction gösterilmedi	✓ **Push açık**
Known Limits	6	Engine'in yapısal sınırları (beklenen)	⊘ Push'u bloklamaz

Coverage Gap Analizi (Known Limits Hariç)

Coverage gap yok — tüm kategoriler temiz.

Known Limits (Kabul Edilmiş Sınırlar)

[ID]	Kategori	Cümle	Not
[61]	malformed-clause	I will you be provide for at bus.	Completely garbled — multiple errors. Known local-rule limit: "will" satisfies finite-verb guard; scrambled word order undetectable without parsing. AI layer handles this.
[146]	question-malformed	Why you explained this to me?	No aux inversion — known local-rule limit (wh + subject + verb FP risk)
[147]	question-malformed	What she provide for the team?	No aux inversion — known local-rule limit
[148]	question-malformed	How he manage the project alone?	No aux inversion — known local-rule limit
[174]	wrong-pos	An explain of the problem is missing.	"explain" used as noun after article — should be "explanation". Local limit: "is missing" satisfies finite-verb guard; determiner-free noun-phrase detection requires NLP.
[175]	wrong-pos	Good manage of resources is essential.	"manage" used as noun after adjective — should be "management". Local limit: adjective (not determiner) subject → Pattern B does not fire; finite verb "is" present.

2. Kategori Bazlı Detay

39 kategori · 176 test case · FN ve FP sütunları known limits hariçtir.

Kategori	Toplam	Pass	Fail	FN	FP	Known Limit
✓ be+bare	5	5	0	0	0	—

3. Engine Mimarisi

1

Local Pre-Validation

Target word tespiti, fuzzy/typo kontrolü, minimum cümle uzunluğu (4 kelime).

↓

2a

_checkGrammar() — 20 Kural (First-Error-Wins)

Rule 1: modal+to · Rule 2: wrong preposition (WRONG_PREP_RULES) · Rule 3: sv-agreement · Rule 4: be-agreement · Rule 5: do/does · Rule 6: modal+participle · Rule 7: double-negation · Rule 8: plural subject+inflected · Rule 9: article · Rule 10: wrong form after aux · Rule 11: different from/than · Rule 12: misspellings · Rule 13: gerund-infinitive · Rule 14: gerund after preposition · Rule 15: reflexive · Rule 16: reflexive/good-at · Rule 17: noun-for-verb argument · Rule 18: stative progressive · Rule 19: double comparative · Rule 20: comparative+than.

↓

2b

Structural Guards (Step 2b)

_localHasBeBareverb · _localHasHaveBareverb · _localHasDoDidPastForm · _localHasDoubleAuxiliary · _localHasAdjacentVerbAuxCollision · _localHasFiniteVerb (8 pass)

↓

3

Correction Validation Gate

validateCorrectedSentence() — _applyAllCorrections() çoklu pass; correction güvenli değilse suppressed. Step 2b ile çakışırsa correction gösterilmez.

↓

4

XP / Success / SRS Gating

status=perfect → XP verilir. status=fail → XP verilmez, SRS'e fail kaydı.

Correction Suppression Mantığı

Ne zaman correction gösterilmez?

1. **Step 2b + Rule 2a çakışması:** _checkGrammar bir hata buldu ama cümlede aynı anda be+bare / have+bare / do+ed / double-aux / no-finite-verb de var → correction suppressed.
2. **expectNoCorrection test case:** Birden fazla yapısal hata varken correction üretmek yanıltıcı olur.
3. **validateCorrectedSentence() başarısız:** Correction cümlesi kendi de fail ediyor → gösterilmez, fallback example kullanılır.

4. Canlı Kullanım Bug Kaydı

docs/grammar-live-bugs.md — Gerçek kullanıcı testlerinden çıkan hatalar.

ID	Tarih	Kelime	Cümle	Hata Tipi	Durum
BUG-001	2026-04-16	describe	I didn't to describe it	wrong-diag	✓ Düzeltildi
BUG-002	2026-04-16	decision	I have to decision this problem	wrong-pos + wrong-diag	✓ Düzeltildi
BUG-003	2026-04-16	describe	A clear describe of the system architecture	wrong-pos + wrong-diag	✓ Düzeltildi
BUG-004	2026-04-16	describe	She is describe her expeirence	multi-error + wrong-diag	✓ Düzeltildi
BUG-005	2026-04-17	support	He has supported about the issue	fn	✓ Düzeltildi

Bug → Fix Akışı

1 Canlı test → Bug kaydı

Beklenmedik davranış görülünce docs/grammar-live-bugs.md'e eklenir. Hata tipi, local-rule adayı mı, known limit mi belirlenir.

2 Stress test'e aktarım

Local-rule adayıysa scripts/grammar-stress-test.ts'e yeni case eklenir. expectNoCorrection ve knownLimit alanları belirlenir.

3 Fix uygulanır

sentenceAnalysisService.ts içinde düzeltme yapılır. npm run test:grammar çalıştırılır.

4 Pre-push hook

.git/hooks/pre-push — ilgili dosyalar değiştiyse otomatik çalışır. FN/FP/unsafe varsa push bloklanır.

BUG-005 Detay: support about (2026-04-17)

Alan	Değer
Cümle	*He has supported about the issue.*
Eski davranış	**perfect (FN) — 10 XP verildi**
Beklenen	fail — wrong preposition
Root cause	support WRONG_PREP_RULES'da yoktu
Fix 1	support(s|ed|ing)? about → WRONG_PREP_RULES eklendi
Fix 2	Pattern B: be-verb içeren subject phrase artık skip ediliyor (This is about support…)
Fix 3	"talk" THIRD_PERSON_VERBS'e eklendi → "talked" finite verb olarak tanınıyor
Stress test	Case [176] eklendi · wrong-prep kategorisi

5. Tüm Test Cases — Tam Liste (1/2: ID 1–88)

ID	Kategori		Cümle	Beklenen	Sonuç	Durum
1	be+bare	**support**	*I am support the team.*	✗ fail	✗ fail	✓
